

AeroPrint™

Atlanta Aviation is an FAA-certified repair station that offers aircraft interior refurbishment for commercial and regional airlines, and maintenance, repair, and overhaul (MRO) facilities. We help operators extend component life, improve cabin appearance, and reduce replacement costs through high-quality interior restoration and support services.

AeroPrint™ is a hydrographic process of decorating interior components versus using traditional wood veneers, marbles, or carbon fibers.

AeroPrint™ attributes:

- Offers patterns such as wood grain, straight grain woods, carbon fiber, brushed metals, marbles, granites, etc.
- AeroPrint™ and its clear top coat are both UV protected, highly abrasive and stain resistant
- Less expensive than real wood veneer
- Considerably lighter weight than real wood veneer
- Offers endless patterns and color possibilities
- Can be book marked so that one door front will match another door front
- Able to decorate two or three dimensional interior parts to achieve high class value, beauty and style to the part
- AeroPrint™ used on honeycomb, aluminum, composites, and other substrates
- Atlanta Aviation can decorate 37"x84" aluminum sheets with the AeroPrint™ process that can be used to upgrade walls in rooms for VIP aircraft
- AeroPrint™ process that can be used to upgrade walls in rooms for VIP aircraft
- AeroPrint™ used to decorated side ledges, tabletops, tray tables, front face of cabinets, accent trim pieces, center consoles, lavatory doors, bulkheads, etc.
- AeroPrint™ meets all FAA FAR 25.853 requirements (part I, III, & IV) AeroPrint™ can be used on Part 121 operator aircraft
- Atlanta Aviation has decorated many interior parts for B777, B737 BBJ interiors, Corporate Jet interiors, and helicopters
